[▶] Play a video

[Edit] Edit selected video information

List OK
목록 확인

4. Register Videos(Add videos)

- ① **[Register Videos]** After selecting a file to register, click start upload to proceed with video upload.
- Depending on the status of the upload, you can control it by [Pause] and [Restart] etc. The video uploading time varies depending on the user environment, but can be registered within 30 seconds based on about 100 MB (*within 10 minutes)
- ② **[Video address/Video file information/Video ID/Basic cover image]** is automatically generated when file registration is completed. The basic cover image is automatically extracted when uploading a video, but a minimum time is required.
If it's not registered normally, you can register normally when the post is "modified" > "saved".
- ③ **[Cover Image]** When registering a individual image, register the recommended size based on 500px*300px.
- ④ **[Section 2]** Subcategories can be selected according to section 1)
- ⑤ **[Exposure]** Available to set whether the video is exposed or not.
- ⑥ **[Video name/Director/Actor/Actress/Story line]** Register in English (automatically expose according to the language)
- ⑦ **[OK]** Click to complete the video registration.
